

Invitation

Heart Failure

A Swiss Webinar series

Arbeitsgruppe
Herzinsuffizienz

18 – 19h, Zoom-sessions in English

Come and join us!

2025: Feb. 25 / Apr. 01 / May 27 / Sep. 16 / Oct. 21 / Nov. 25

Approximately 150 000 patients suffer from Heart failure in Switzerland with an incidence of 100–900 cases per 100 000 person-years making it a major public health concern ^{1,2}.

Developing awareness and improving heart failure patient care is a key objective of the Heart Failure Working Group of the Swiss Society of Cardiology. On this notion, the group is happy to invite you to a regular rendezvous with heart failure specialists from all over Switzerland.

The fourth cycle of the successful Swiss Heart Failure Webinar Series will cover a wide range of topics in the field of heart failure management. Each webinar will contain a main talk about a clinically relevant heart failure topic, followed by a moderated discussion. Each webinar (except the HFA update webinars) will also feature a “speed journal club” at the end, in which a young clinical fellow will present and discuss a recently published study. With the new and slightly adapted format we hope to address your needs even more and help you staying up to date in the growing field of heart failure management.

Heart failure management needs a multidisciplinary team. Therefore every healthcare professional with an interest on the topic, from general cardiologists, internists, interventional cardiologists, diabetologists, geriatricians to heart failure specialists and nurses are invited to participate.

Scan the QR code and register today! We look very much forward to your participation.
