Heart Centre, Lucerne Cantonal Hospital

LUCCA – LUcerne Complex and CALcified PCI Meeting

Friday 8th April 2022

Luzerner Kantonsspital Luzern, Grosser Hörsaal

Dear Colleagues,

We are pleased to announce our complex coronary intervention meeting called **LUCCA – LU**cerne **C**omplex and **CA**lci-fied PCI Meeting. This meeting will be held on Friday, April 8, 2022, in our Heart Centre at Lucerne Cantonal Hospital in Lucerne.

The field of complex PCI and treatment of calcified lesions is advancing rapidly. However, many aspects are still controversial, and study data remains limited. Hence, we have decided to organize an interactive meeting, which aims to discuss current strategies and future aspects. Renowned speakers from Switzerland, Germany, Italy, India, North America and the United Kingdom will present the latest data and developments in the field of complex PCI. We are also pleased to announce the participation of two legends in the field, Dr. Achim Büttner and Prof. Antonio Colombo. The sessions on Friday will be accompanied by live cases. We will review the latest techniques for lesion preparation as well as current data on stents and drug coated balloons. Our objective is to create an interactive environment. All speakers and participants will be encouraged to share their views and practices.

The LUCCA meeting is expected to be one of the first meetings to focus specifically on the treatment of complex and calcified coronary lesions in Europe. We are convinced that by creating a faculty of pioneers and experts in this field, we will provide an educational environment and a rewarding course. This meeting will comply with all the regulations regarding the ongoing COVID-19 pandemic. We will keep all participants posted about the travel and safety regulations in Switzerland. An invitation with all details and the possibility to register will follow as soon as all speakers have been confirmed.

We look forward to welcoming you in Lucerne in April 2022.

PD Dr. med. Florim Cuculi

Co-Chief Physician Cardiology Heart Centre Lucerne Cantonal Hospital
Course Director
