Heart Failure

Arbeitsgruppe
Herzinsuffizienz

A Swiss Webinar series

18 – 19h, Zoom-sessions in English

Come and join us!

2023: Apr. 25 / May 30 / Jun. 27 / Aug. 29 / Sep. 26 / Oct. 31 / Nov. 28 / Dec. 19 //
2024: Jan. 30 / Feb. 27 / Mar. 26

Approximately 150 000 patients suffer from Heart failure in Switzerland with an incidence of 100–900 cases per 100 000 person-years making it a major public health concern ^{1,2}.

Developing awareness and improving these patients care is a key objective of the Heart-Failure Working group from the Swiss Society of Cardiology. That's why, the group is happy to invite you for a monthly HF rendez-vous to exchange with specialists from all over Switzerland.

Every last Tuesday of the month, in a friendly format, you will dive into the state-of-the-art of current HF-management. In every session a new topic will be addressed. Discussing guidelines, literature and daily practice, the speakers will engage in an interactive session. Takeaways from each evening will be provided so that participants can take potential actionable advice to apply on their patients.

According to the latest guidelines³, heart failure management has to be a multidisciplinary approach. Therefore, every physician with an interest on the topic, from general cardiologists, internists, interventional cardiologists, diabetologists, geriatrics, interns ... etc. is invited to participate.

Scan the QR-code and register today! We look forward to seeing you online,

PD Dr. med. Mattia Arrigo

Dr. med. Tobias Höfflinghaus

Dr. med. Piotr Sobanski
